Release Notes 2009-12-25

Config db ntf: 20091108152500
Analyze db ntf: 20091225184500
Windows Version: 1.9.1 :: MAC OS X Version: 1.9.10 :: Linux Version: 1.7.19
Eclipse Plugin:

Major Improvements: New (optional) HW/SW Monitoring Agent and corresponding views

Configuration Database	
- No changes -	- No changes -

Analyze Database	
FIX	fixed a problem where the client platform was not displayed in detail in user profiles (e.g. just "Windows" instead of now "Windows XP exact version")
EN HA NC EM ENT	Added a new Addon Agent: "X. Addon INVENTORY: Collect HW Details" similarly to the PERNAB Addon Agent, the agent requires MC_UploadDB to be set in notes.ini and pointing to the Analyze database; suggested value being MC_UploadDB=%notes_homeserver%!!panagenda\mc_analyze.nsf (or whatever the correct path to the analyze database in fact is) In addition, the agent requires the following ini-variable: **MC_AddonColKeyInv**=<os:user>\<os:computer> (suggestion as OS hardware and software are only different per OS user and machine, but not per notes release or notes username) **MC_AddonColGetHWDetails**=1 (Collects CPU und Memory details - exact CPU model & family; Max. possible and current physical memory including information about how many memory banks are used vs. available) **MC_AddonColGetLogicalDriveInfo**=1 (Collects information about all logical drives on a machine, including total size and free space in MB/GB and percent) **MC_AddonColGetProductInfo**=1 (NOTE: it may well take 30-45 seconds on a machine to collect installed product/software information!) NOTE that the agent resets all three ini variables MC_AddonColGetHWDetails, MC_AddonColGetLogicalDriveInfo, and MC_AddonColGetProductInfo after each run to make sure that all such detailed OS analysis is only done if so explicitly requested/set at each run. In general, it is recommended to only perform such an inventory when needed and not upon every client startup as HW/SW does not change every day.
EN HA NC EM ENT	Added 5 new INVENTORY views to see which users have admin rights and above collected information.
EN HA NC EM ENT	Added a few additional fields to also visualize the following info in user profiles: total physical memory and free disk space on Notes Program- and Data- directory disks
EN HA NC EM ENT	Added two buttons to the java table display of detail documents (desktop icons, local databases, notes.ini details): These new buttons allow to copy the java table contents (all or just selected rows) to the clipboard.

.DLL Updates (Windows)
