Release Notes 2008-09-09

Config db ntf: 20080909163000
Analyze db ntf: 20080811172500
Windows Version: 1.5.9.243 :: MAC OS X Version: :: Linux Version:
Eclipse Plugin

Major Improvements: Enhanced Who Tab, New option to reference Actions via an alias, enhanced desktop icon Action, new Regular Expression Action, support for 8.0.2 and 8.5 beta

Configuration Database	
FIX	Added remarks field to various actions that did not allow for remarks previously
FIX	When saving attachments, the target filename no longer changes when clicking on a different filename in the explorer embedded into the save dialog
ENHANCEMENT	Added option to specify readers/excluded users directly on people/who tab
ENHANCEMENT	Added option to create a bookmark along with a desktop icons action (requires new DLL from this release)
ENHANCEMENT	Added option to restrict action to users with specific home/mail servers only (requires new DLL from this release)
ENHANCEMENT	Added new RegExp Action (Tasks --> RegExp) (requires new DLL from this release)
ENHANCEMENT	Added new alias architecture, which allows to reference action results using <alias:variable> (requires new DLL from this release) (currently mostly for the new RegExp action; new variables and assoociated documentation subject to be delivered with next release)
ENHANCEMENT	Added preview to desktop icon action for the database icon the DLL deploys for newly created icons
ENHANCEMENT	Fixed a problem with Online Update for certain Proxy Environments; added option to choose to connect via HTTP 1.0 or HTTP 1.1
ENHANCEMENT	Added option to automatically remove desktop icons for users not listed as readers and/or excluded users (requires new DLL from this release)
ENHANCEMENT	Added option to not autoadvance all files during a backup action, but only changed files (requires new DLL from this release)
Analyze Database	
- No changes -	- No changes -
