

The MarvelClient Configuration Database

Tip: Press [F1] at any time in the MarvelClient Configuration and Analyze databases for context-sensitive help.
When creating or editing documents in the MarvelClient configuration database, pressing [F9] validates your input.

The MarvelClient Configuration database is laid out as follows:

The screenshot shows the MarvelClient Configuration database interface. The interface is divided into several sections:

- 1**: A link to the MarvelClient Analyze database (top left).
- 2**: The name of the user who opened the Configuration database (top center).
- 3**: A language selector (top right).
- 4**: The Action bar (top center, below the user name).
- 5**: The Navigator to switch between views and configuration options (left sidebar).
- 6**: The currently opened view or configuration form (main content area).
- 7**: Indicator whether the database was opened on local (red) or on (which) server (green) (bottom left).
- 8**: A link to display version information about the Configuration database (bottom right).

The main content area displays a table of configuration items:

#	Active	0/1	Priority	Type	Who	When	Last modified UTC+SEQ	Conditions
27	4			- Aliases -				
18	7			Bookmark				
7	0			BookmarkFolder				
233	170			BulkDatabase				
4	0			BulkManagement				
6	2			BulkServerList				
1	0			ConfigBookmarks				
1	0			ConfigECL				
2	1			ConfigIDFile				
3	0			ConfigLocations				
2	1			ConfigPreferences				
1	0			ConfigRefreshUserinfo				
1	0			ConfigStatusbar				
1	1			ConfigSystemRPEs				
1	1			ConfigUserassist				
1	1			ConfigWorkspace				
1	1			ConfigZipUnzip				
1	0			ConfigZipUnzipUIContext				
6	0			Connection				
52	6			DesktopIcon				
1	0			EclipseConfigGet				
8	0			EclipseConfigSet				
8	2			EclipsePluginInstallUninstall				
3	0			EclipsePreferences				
2	0			EclipseSametimeAutoStatus				
3	0			EclipseSametimeCommunity				
2	1			EclipseSametimeMeeting				
1	0			EclipseSpellcheckWords				
1	0			EclipseStartupTabs				
2	0			FCI Management				

1. A link to the MarvelClient Analyze database
