

# MC dll/dylib - 10.0.3

This component release is part of [MarvelClient 10.0](#)

|             |                                                                                                                                                                                                                                                          |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FIX         | Fixed an issue with the code that handles multiple versions of MC binaries running at the same time. In a few combinations of versions /editions of MC this lead to several or no binaries being loaded.                                                 |
| ENHANCEMENT | Added better detection of older MC binaries for cases where multiple binaries get loaded at the same time. Note: this does not mean older binaries will be disabled if they are loaded with a newer version, only that the new version detects them now. |
| CHANGE      | Each instance of MC that is running will report all its findings about other versions to Notes client clock output.                                                                                                                                      |
