dll/dylib: [10.0.23](#)
Upgrade: [10.1.26](#)
Eclipse plugin: [3.0.4](#)

What's new?

An overview of some of the more prominent changes; for more in-depth information consult the other sections further down, especially the detailed release notes.

MarvelClient Upgrade Configuration Wizard

Upgrade has been a module for a long time, but it has always required quite some manual effort to configure and use. This now changes!

We've fully integrated Upgrade into the Config DB. You can manage your installer packages, OnlineUpdate downloads and updates the Upgrade binaries for you, and we've added a configuration wizard that takes care of all the little details for you. With it, you have one place where you can configure MC Upgrade, and all the action are created and maintained by that single configuration. You have a simple mode where you only make the absolutely necessary decisions and MarvelClient takes care of all the rest with good default values, or you can dive deep and configure every little detail in an advanced mode.

MarvelClient Upgrade Free Edition

Notes 10 is great. In order to make upgrading to it easier, we decided to create a [Free Edition of Upgrade](#), available for everyone!

This Free Edition has the full feature scope, but is limited to a small number of verified installers (Notes 10.0.1, 10.0.1 FP1, language packs, ...). Current MarvelClient customers have it automatically via OnlineUpdate. Anyone who does not have MarvelClient yet, or is only using MarvelClient Essentials, can redeem their Free Edition [here](#).

You can learn more about the configuration wizard and the Free Edition [on our website](#) and in the [quick start guide](#).

System Requirements

End-Users

Notes client: 6.x, 7.x, 8.x, 9.x, 10.0.0, 10.0.1, 10.0.1 FP1. This includes Basic, Standard and ICAA clients.
Operating system: Windows 2012 R2, 2016, 7, 8, 10, and Citrix/WTS. Apple Intel macOS 10.12-10.14.
Linux.
Note: Support is limited for platform and release combinations not supported by IBM

- [Detailed Release Notes](#)

Notes client releases for certain administrative tasks, such as OnlineUpdate, require Notes 9.0.1 FP8+ and are limited to Notes clients running on Windows.

Servers

Any Domino and OS version supported by IBM.

Platform-specific limitations

Some functionality is not available on all Notes client operating systems.

Linux

Our support for Linux is generally limited, newer features will not be available. A list of major functionality that is absent:

- Eclipse Management
- Skinning
- Realtime
- Zip/Unzip
- Attachment Blocking
- Runtypes: "Before Login - Init", "After Login - After Write", "On first server access", "Background - Init" and "Background"

macOS

- Eclipse Management
- Skinning
- Realtime
- Zip/Unzip
- Attachment Blocking
