Latest Public Release

Intro

This documents lists the releases that have been elevated to the Public release channel (What are release channels?).

Latest Public as of December 2023

Config: 20231205133700
Analyze: 20231106123200
Binary: 14.0.1
Eclipse plugin: 14.0.0
Upgrade: 14.0.0

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- New MarvelClient release for the new **HCL Notes 14 client!**
- New options for automating the process of replacing the design of your user's mail databases
- New option to use background replication for local replicas
- Lots of enhancements and fixes to address the differences between the original 12.0.2 64-bit client and the new Notes 14 64-bit client
- For more information on what's new in MarvelClient 14, please see the MC 14.0 anchor page

Latest Public as of May 2023

Templates: 20230111200500
Binary: 12.0.62
Eclipse plugin: 12.0.0
Upgrade: 12.0.35

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Added 256-AES encryption and Dark Mode options for Notes 12.0.2
- MCUpgrade client detection now also supports Notes 64 Bit clients

Latest Public as of March 2023

Templates: 20230111200500
Binary: 12.0.38
Eclipse plugin: 12.0.0
Upgrade: 12.0.26

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Template support for **HCL Nomad Roaming** (see linked page for Nomad requirements)
- Full template support (including Online Update) for the new **Windows 64 bit client**

Latest Public as of July 2022

Templates: 20220701145300
Binary: 12.0.38
Eclipse plugin: 12.0.0
Upgrade: 12.0.26

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Template support for **HCL Nomad Local Replicas, Restrict, and Background Runtime** (requires Nomad Web 1.0.4 or higher)
- MCUpgrade improvements for Notes 12.0.1 installs

Latest Public as of December 2021

Templates: 20211111123000
Binary: 12.0.30
Eclipse plugin: 12.0.0
Upgrade: 12.0.20

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Template support for **HCL Nomad Web Migration** (requires Nomad Web 1.0.2 or higher)
- Support for Windows 11 and MacOS Monterey

Latest Public as of September 2021

Templates: 20210916084300
Binary: 12.0.19
Eclipse plugin: 12.0.0
Upgrade: 12.0.16

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Template support for **HCL Nomad Web**
- Fixes and updates to support the new Notes 12.x workspace

Latest Public as of August 2021

Templates: 20210816160000
Binary: 12.0.11
Eclipse plugin: 12.0.0
Upgrade: 12.0.16

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- New languages added for Config and Analyze templates: Spanish, French, Italian, Dutch, Russian. Japanese language was also updated.
- Added a WSS port to support SafeLinx on Location and Connection documents.
- IMPORTANT: if you were using Location or Connection actions for Nomad clients, you must open the action documents in the Config database, manually select the Nomad clients they should run on, and resave the action.
    - this is to verify that global Location and Connection settings only get sent to Nomad clients on purpose

Latest Public as of July 2021

Templates: 20210629112700
Binary: 12.0.11
Eclipse plugin: 12.0.0
Upgrade: 12.0.9

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- Fixes for **Location action** related to using "set all to onlynew".
- **Upgrade Wizard** got some fixes and a new nice.exe for Notes 12.
- Fixed a problem with the **Audit agent** where it would fail to process large batches of documents on Domino 11.0.1 FP3.

Latest Public as of June 2021

Templates: 20210525132900
Binary: 12.0.11
Eclipse plugin: 12.0.0
Upgrade: 12.0.9

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- **Full support for Notes 12**
  IMPORTANT: you must update your MC Binary to a 12.x version BEFORE updating your Notes client!
- Full support for **MacOS BigSur**
- More options for managing **replication page options**, including:
  - replication priority for local databases
  - send outgoing mail
  - send outgoing Internet mail
- Added support for **mail blocking based on time condition** (days of week, start and end times).

Latest Public as of April 2021

  Including several new views with information about local databases on client machines.

Latest Public as of October 2020

Templates: 20200616123000
Binary: 11.0.19
Eclipse plugin: 11.0.3
Upgrade: 11.0.30

Overview of selected changes since the previous public release:

(This list is very incomplete, for all changes please see the release notes linked above.)

- **Geolocation**
  Analytics data and a new condition based on geographic location of users/devices.
- **Cloud Migration** functionality
  Move to, from, or between cloud providers.
- **Server Access Restrictor** feature
  Prevent Notes clients from accessing Domino servers unless they have MarvelClient installed.
- **HCAA** support
- MC is now built into Nomad on **iOS** and **Android**
- Set **Workspace Background** (for Notes 10+)
  A new part of the UI introduced with Notes 10 - can now be configured and deployed by
  MarvelClient.
- New options to manage more entries on the **replicator page**
  Application Templates and Sync Activities can now be configured.
- **OnlineUpdate** now periodically checks for new releases
  This happens when the ConfigDB gets opened by an admin.
- Built-in **support data collection**
  A way to collect all local files relevant to MC and Notes problems directly into the Analyze
  database (or via mail).
- Significant **MMR** (manged mail replica) fixes and enhancements
- **AES encryption** for local replicas
- Change **replication formula** on existing replicas
- MC Upgrade **UI improvements**
  Hide/Unhide for progress bar, progress on tray icon, font improvements, animated GIF support
  and more.
- MC Upgrade improved **SMTP Emails**
  Supporting all operating system locales, as well as SSL.
