

Release Notes v4.5.7

We just announced a new release of GreenLight, the Monitoring Solution for HCL Domino and others.

The most notable features and improvements are listed below.

A new kbase document got recently added which describes what you need to do in case you plan to run **yum update / yum upgrade**

>>> [yum updates/upgrades](#)

Improvement	Support Docker Storage Driver - overlay2 Updating the docker daemon (with yum update) results in a new docker storage driver. Therefore overlay2 (new driver) needs to be reflected in the overall GreenLight config if the daemon got updated. Please refer to this kbase article: Overlay2 - after yum update
Improvement	Backend Java Version The backend Java version has been upgraded to the latest version 8. Java v1.8.0_362
Improvement	Backend Tomcat Version The backend Tomcat version has been upgraded to the latest version Tomcat v9.0.69
