We are 100% focused on maximizing the value of collaboration platforms for our customers and empower enterprise IT with unique and essential advantages to ensure optimal user experience and productivity for their employees."

Florian Vogler
Co-Founder and CEO, panagenda

Our Story

The story of panagenda starts long before its' foundation in 2007. The five co-founders and friends had already worked together for 10 years at previous companies in the banking and IT industry.

When we founded panagenda, we identified a unique opportunity to help Lotus and later IBM and HCL customers better manage their Notes clients. From there, until 2017, panagenda revenues grew by double to triple digit percentages every year. Throughout the years, we have had the honor to work for and with customers in more and more countries and all industries. And just as important, more and more people joined panagenda – we call ourselves panagendians – to make a difference. Together, we strive for long-lasting relationships with our customers and partners.

From 2017 to 2019, we re-invented ourselves to repeat the same success for Microsoft 365 customers.
Since 2019, we continue our growth path in both the Microsoft and HCL markets around the world as an exclusively privately owned and funded business.

Some of our most prominent software solutions include:

OE	Microsoft 365 & Teams Call quality analytics	OfficeExpert provides real-time insights into the user experience and performance of M365 and Microsoft Teams calls and meetings, enabling organizations to identify and resolve issues that impact productivity and user satisfaction.
MC	HCL Notes Client Management	MarvelClient helps Lotus, IBM and HCL Notes and Domino customers minimize their total cost of ownership, reduce their helpdesk tickets by 80% and achieve many more game-changing results.
iDNA	HCL Domino Application Analysis	iDNA Applications is the one and only turn-key solution for analyzing Usage, Code and Content of Lotus, IBM and HCL Domino application landscapes to drastically optimize migration and modernization efforts.

Future Plans

panagenda continues on its mission to be the first-choice supplier for customers who rely on Microsoft and HCL and who want the best possible total cost of owner-ship and end user experience.

We want every business to run our solutions.
We want you to be our customer.
