

# MC Config - 20230831120000

This page was moved to [MC 14.0 - Database Release Notes](#)  
Click in the link above if you are not automatically redirected in 10 seconds.

 This component release is part of [MarvelClient 14.0](#)

## Config DB - General

<b>NEW</b>	The Application/Mailfile action has a new "Background" option on the Local Replica tab when creating a new local replica.  This new functionality requires MarvelClient 14.0.1 or higher.
<b>ENHANCEMENT</b>	OnlineUpdate now works properly on the Windows 64-bit client when using the "LotusScript" connection option  <b>NOTE:</b> the 64-bit version of Notes 12.0.2, up to and including FP2, OnlineUpdate will not work properly with a connection option of "LotusScript" and a proxy option "Use System Settings". This is due to a bug in the Notes client that was fixed in 12.0.2 FP3 and Notes 14.0.0. If you are using an affected version of 12.0.2, please choose a different connection option, or use the menu option Actions – O. Online Update – 1. Perform Full Online Update instead of using the OnlineUpdate form.
<b>ENHANCEMENT</b>	The example INI filters used by backup and roaming actions now include EXTMGR_ADDINS, AddinMenus, and NSF_HOOKS to make sure those settings don't roam (they can cause issues roaming between 32-bit and 64-bit clients, or between Mac and Windows clients).
<b>FIX</b>	Fixed a problem where the GetLicenseInfo.xml file generated by OnlineUpdate could be locked as a zero byte file if incorrect connection options were used, requiring a restart of the Notes client before the file could be deleted or overwritten.
<b>FIX</b>	If "Variable" is selected as the Local Replica option on an Application/Mailfile action and the Variable field is empty, the validation display shows the wrong text.

## Config DB - MC Upgrade UI

<b>ENHANCEMENT</b>	Indexing of installers for MarvelClient Upgrade now also detects bitness of the selected file itself. This can come in handy to detect the bitness of executables like notes.exe or similar (after which the indexer document should be deleted 😊)
