

# Release Notes 2011-10-30

Config db ntf: 20111030151500  
 Analyze db ntf: 20111030151500  
 Windows Version: 2.5 :: MAC OS X Version: 2.0.35 :: Linux Version: 2.0.29  
 Eclipse Plugin:

**Major Improvements: Updated HW/SW Inventory agent, updated Collect Locations & Connections agent, Analyze cleanup agent now supports long result emails, Added release Notes view to MC Config database, Fixed a problem with database.xsl, Online Update 404 Fix**

General Notes					
	Supported IBM Lotus Notes releases: 5.x, 6.x, 7.x, 8.x, up to 8.5.3 (Administrators need at least IBM Lotus Notes 7.x on Windows or Linux) Supported client-side operating systems: Microsoft Windows NT4 (>=SP2), 2000, XP, 2003, 2008, Vista, 7, and Citrix/WTS, Apple Mac OS X Leopard & Lion, Linux Supported server-side operating systems: any supported by IBM (operating system independent) <i>NOTE: Support is limited for platform and release combinations not supported by IBM</i>				
	Linux & Mac OS X: Skinning, Realtime, Zip/Unzip and Attachment Blocking are not available on Linux or Mac OS X; <b>MarvelClient on Mac OSX and Linux does not support the runtime "After Login - Before Sync" - any such actions must be set to run at a different supported runtime, e.g. "After Login"</b> <b>MarvelClient on Mac OSX and Linux does not support the runtime "On first server access" - any such actions must be set to run at a different supported runtime, e.g. "After Login - After Write"</b>				
<b>IMPORTANT NOTES</b>	This release contains <b>select important updates highlighted in red</b>				
Configuration Database					
FIX	Online Update of type LotusScript has been fixed to no longer display an irritating error 404 (http status code for "not found") "Could not download templates_override.html"				
FIX	The smart file downloader displayed "Unknown" as document type; this has been fixed				
FIX	The compact desktop action displayed a wrong quick info text (blue help box at the beginning of the form)				
NEW	Added various MC Upgrade example documents for customers with an MC Upgrade license				
NEW	Release Notes are now displayed in the Information category of the navigation pane in the configuration database				
NEW	In preparation of an upcoming DLL update, the Configuration database now has a new action "Settings\CID. ID-File Settings" which will allow to enable/disable the "Don't prompt for a password from other Notes based tasks" setting under "File\Security\User Security ..."				
Analyze Database					
FIX	The database.xsl document did not properly update for some customers during last online update - it would contain a fieldname "lt_simulated" at the top of the sync field names: <table border="1" data-bbox="279 1419 711 1839"> <thead> <tr> <th>WRONG</th> <th>CORRECT / FIXED</th> </tr> </thead> <tbody> <tr> <td style="height: 150px;"></td> <td style="height: 150px;"></td> </tr> </tbody> </table>	WRONG	CORRECT / FIXED		
WRONG	CORRECT / FIXED				
CHANGE / ENHANCEMENT	The view "ID Files by Act. & Expiry Date" has been changed as follows: a top-level category has been added to distinguish by Certifier and User Activation/Expiry dates.				

CHANGE	The HW/SW inventory agent has been changed to better detect whether a user has admin rights or not for Windows XP, Vista & 7 - please make sure that - after applying the new template updates - you click on "Check for update" in the "Run Agent" action(s) that carry out the HW/SW inventory (if any).
CHANGE / ENHANCEMENT	The HW/SW inventory agent now collects various security details into whoami_* fields in the HW/SW audit result documents (Windows Vista & 7 only) - please make sure that - after applying the new template updates - you click on "Check for update" in the "Run Agent" action(s) that carry out the HW/SW inventory (if any).
CHANGE / ENHANCEMENT	The HW/SW inventory agent now also adds cluster members of the server being uploaded to into the reader fields of the HW/SW inventory result documents - please make sure that - after applying the new template updates - you click on "Check for update" in the "Run Agent" action(s) that carry out the HW/SW inventory (if any). <b>Applying this update is a MUST for customers that only give the role [Admin] to a hub server but not to spokes to keep the analyze database small on spoke servers.</b>
CHANGE / ENHANCEMENT	The Collect Locations & Connection agent now also adds cluster members of the server being uploaded to into the reader fields of the collected documents - please make sure that - after applying the new template updates - you click on "Check for update" in the "Run Agent" action(s) that carry out the collection of locations and connections (if any). <b>Applying this update is a MUST for customers that only give the role [Admin] to a hub server but not to spokes to keep the analyze database small on spoke servers.</b>
ENHANCEMENT	The cleanup agent can now send large result emails - in previous releases, the maximum result length was limited to around 32 KB - Cleanup/Autemailer log emails are now limited to around 2 GB.
NEW	In preparation of an upcoming DLL update, the Analyze database now shows new categories in the "ID Files\by Cert. & more" view: Together with an upcoming DLL update, this view allows monitoring of whether users have a.) SSO enabled (Notes Single Sign On) b.) "Don't prompt for password for other Notes based tasks" enabled
<b>.DLL Updates (Windows)</b>	
- No changes -	- No changes -
<b>.dylib Updates (Mac OS X)</b>	
NEW (2.0.35)	MarvelClient now supports Mac OS X Lion
<b>.so Updates (Linux)</b>	
- No changes -	- No changes -
