

Release Notes v1.1.0

panagenda is proud to announce the release of this new version of ConnectionsExpert, the all-in-one solution for IBM Connections Analytics, Monitoring and accelerating Adoption.

The new version contains a variety of performance improvements, bug fixes and new features. Here are a few highlights:

- Support for IBM Connections on Oracle
- Enhanced User Profiles Interface
- Enhanced Community List with Tag Filtering

For compatibility reasons, all installations have to be upgraded to this release. The existing appliance will stay in place and no historical data will be lost in the process. Simply [download the installation package](#) and extract the debz file from the zip to prepare the upgrade. Install the new version via the URL /pac on your server or using the menu option "Install New Version ..." in the configuration menu. For detailed instructions please take a look at the [ConnectionsExpert Setup Guide](#).

Don't waste any time and update your installation right now to get most out of your trial period!
