

The When Tab

The When tab is used to configure how often and under what conditions an Action is to be executed.

NOTE: The Who tab supersedes the When tab - the When tab is only relevant if a user actually gets an Action according to the Who tab.

1. How often an Action is to be executed:
2. If an action is set to run more than once, limit the total number of executions to e.g. 3 or 5 or ...
3. Information as to whether execution of an Action is tied to further Conditions.
4. Buttons to create additional Conditions
5. Enabling the selection of one or multiple Conditions out of which all selected must match
6. A list to select one or multiple conditions from
7. List of selected conditions - this is especially helpful to immediately see all selected conditions.
8. The option to combine the ALL and At least ONE list of Conditions with a logical AND or OR (this is only visible if both the ALL and At least ONE list are enabled)
9. Enabling the selection of one or multiple Conditions out of which At least ONE must match
10. The option to restrict an Action to only run for users on a particular mail/home server

The screenshot shows the 'When' tab configuration interface. It is divided into several sections:

- Conditions - Help:** Contains text explaining that conditions allow specifying when, how often, and under which conditions an action shall be executed.
- Repeat?:** Includes radio buttons for 'Once only', 'Once a day only', 'Once from start to end', and 'Persistent' (selected). Callout 1 points to this section.
- # of Executions & Conditions:** Includes a checkbox for 'Limit # of executions' and a note: 'Execution of this action is restricted as follows: All 2 conditions AND at least one of 2 conditions must be met.' Callout 2 points to this section.
- Add new condition ...:** Includes buttons for 'Time', 'String', 'Numeric', 'IP Range', and 'IP Adapter'. Callout 4 points to this section.
- ALL:** A section with a checked checkbox and the text 'of the following conditions must be met:'. Callout 5 points to this section.
- At least ONE:** A section with a checked checkbox and the text 'of the following conditions must be met:'. Callout 9 points to this section.
- Condition Lists:** Two lists of conditions are shown. The first list has 2 conditions selected, and the second list has 2 conditions selected. Callout 6 points to the first list, and callout 7 points to the second list.
- Logical Operators:** Radio buttons for 'ALL of the above *AND* at least ONE of the following:' (selected) and 'ALL of the above *OR* at least ONE of the following:'. Callout 8 points to this section.
- Restrictions:** Two sections on the right side of the condition lists. The first section has two checked conditions: 'Only on Windows' and 'Platform (Chassis) Laptop: All clients of type'. Callout 3 points to this section. The second section has two checked conditions: 'Client: Notes >= 8' and 'Random: One out of 30'. Callout 10 points to this section.

- Specifying How Often an Action Is Supposed to Run (Repeat Interval)
- The "Keep local exec. info" Option
- Configuring a Maximum Number of Executions
- Selecting One or Multiple Conditions
- Selecting One or Multiple Conditions of Which ALL Must Match for an Action to Execute
- Selecting One or Multiple Conditions out of Which At least ONE Must Match for an Action to Execute
- Combining the ALL and At Least ONE List of Conditions
- Restricting an Action to Only Run for Users with a Specific Home/Mail Server
