Combining the ALL and At Least ONE List of Conditions

When enabling both the "ALL" and "At least ONE" list of Conditions on the When tab, both lists can be logically combined using either AND or OR:

Example 1:

[Client has 2 GB of memory] and [Client has 2 GB of free disk space]

AND

[Client is in IP segment A] or [Client is in IP segment B]

Example 2:

[Client is laptop] and [Client is in IP segment C]

OR

[Client is Desktop]
