

Selecting One or Multiple Conditions out of Which At least ONE Must Match for an Action to Execute

Checking the "At least ONE" checkbox allows to select one or multiple Conditions out of which at least one must match for an Action to effectively execute.

Good Example 1:

[Client is laptop] or [Client is desktop]

Good Example 2:

[Client operating system is Windows] or [Client operating system is Mac]

Good Example 3:

[Client is in IP segment A] or [Client is in IP segment B]

Bad Example:

Multiple Conditions which should all match - such a combination of Conditions should be selected in the "ALL" list of Conditions.
