Release Notes v3.2.2

This is an Improvement/Bug Fix Version

Improvement

Domino Cluster Analysis Sensor:

Now you can exclude folders from the Cluster Analysis

Domino DB Access Sensor:

Type: "Databases Size Check" can now exclude folders

Login:

The Login process has been tremendously improved

Mailflow Analysis Sensor:

We have improved the error handling in a way that you can now make use of the Notes API Error code within Actions if for instance the Mail Gateway is not reachable (gateway mail.box not accessible, a.s.o)

Bug Fix

Sametime MultiSite Simulation:

Fixes an issue where the Sensor Settings configuration Tab rendered blank

Linux Shell Script Action:

Fixes an issue where multiple "blanks/spaces" in the parameter field was causing an issue
