Sametime Meeting Simulation

The Meeting Simulation for Sametime is a sophisticated Sensor which simulates an entire Meeting run.
It starts with ..

> logging into Sametime,
> followed by the creation of a room,
> joing the room by a second user,
> uploading a document,
> sharing the document,
> leaving the room,
> deleting the room

For each of these steps, GreenLight measures the time how long they take.

Configuration

Open the Sametime Meeting Simulation Sensor and fill in all necessary fields.

Settings	Targets	Actions	Schedule

First User

Protocol http ▼

Port 9082

Username * dmaroni@greenwell.com

Password * ********

Second User

File Size * 1 MB ▼

Username * fadams@greenwell.com

Password * ********

Save & Close   Discard Changes

> First and Second user are NORMAL Sametime Meeting User!
>
> Port: SOAP Portnumber of the Meeting Server
> Filesize: one can choose between 1MB and 5 MB

Result

The Sensor result would be this:

Key	
greenlight.sametime.meeting.doc.share.time	429
greenlight.sametime.meeting.doc.upload.1mb.added.time	530
greenlight.sametime.meeting.doc.upload.1mb.conversion.time	39.096
greenlight.sametime.meeting.doc.upload.1mb.time	39.627
greenlight.sametime.meeting.doc.upload.delete.time	429
greenlight.sametime.meeting.room.create.time	77
greenlight.sametime.meeting.room.delete.time	21
greenlight.sametime.meeting.room.join.time	13
greenlight.sametime.meeting.room.leave.time	18
greenlight.sametime.meeting.server.access.time	72
greenlight.sametime.meeting.server.login.time	57
greenlight.sametime.meeting.server.logout.time	4

Which you can further use with the Charting Framework:
