

Sametime Videomanager Statistics

Starting with GL v3.1, one can now monitor in detail the status of the Sametime Videomanager. Polycom DMA7000 is used here within Sametime. The configuration itself is part of the existing *Sametime Statistics Sensor*.

Configuration

Open the *Sametime Statistics Sensor* and select "*VideoManager Statistics*" as type

Settings

Targets

Actions

Schedule

Type *

VideoManager Statistics (Websphere) ▾

Protocol *

http ▾

Port *

8884

Timeout *

10000

Username *

alex_key@ext.greenwell.com

Password *

Save & Close

Discard Changes

- Port: SOAP Port of the Meeting Server
- Username: Standard User (no further privileges are necessary)
- Target: specify the Sever which hosts the Videomanager

Result

Plenty of key/value pairs are retrieved, giving you detailed information about the VideoManager Status.
