

# Upgrade ApplicationInsights (< v1.5.1)

1. Install the new version via the URL **https://<FQDN or IP>/pac** or using the menu option **Install New Version ...** in the configuration menu (default User Name & Password: "config")
2. Please click on the folder icon to select the ApplicationInsights upgrade package ai-complete.debz and
3. Click on the **Upload** button.

A message will appear that the upload is in progress or you will get an error message if something went wrong. When the installation is done, ApplicationInsights will restart automatically.
