

Release Notes 2012-08-13

Config db ntf: 20120813160000
 Analyze db ntf: 20120806213000
 Windows Version: 3.0.2 :: MAC OS X Version: 2.0.39 :: Linux Version: 2.0.39
 Eclipse Plugin: 1.0.0

Major Improvements: Fixed a problem with Eclipse Plugin update and DLL update, fixed a problem with umlauts in ID vault prompt, plus minor update for Mac and Linux

| General Notes | |
|---------------------------|--|
| | Supported IBM Lotus Notes releases: 5.x, 6.x, 7.x, 8.x, up to 8.5.3 (Administrators need at least IBM Lotus Notes 7.x on Windows or Linux) Supported client-side operating systems: Microsoft Windows NT4 (>=SP2), 2000, XP, 2003, 2008, Vista, 7, and Citrix/WTS, Apple Intel Mac OS X Leopard & Lion, Linux Supported server-side operating systems: any supported by IBM (operating system independent) <i>NOTE: Support is limited for platform and release combinations not supported by IBM</i> |
| | Linux & Mac OS X: Skinning, Realtime, Zip/Unzip and Attachment Blocking are not available on Linux or Mac OS X; Citrix, Linux & Mac OS X: the MarvelClient Upgrade module is only available on Windows (=not on Citrix, Linux or Mac OS X) MarvelClient on Mac OS X and Linux does not support the runtypes "After Login - Before Sync", "After Login - After Write" and "On first server access" - any such actions must be set to run at a different supported runtime, e.g. "After Login" |
| IMPORTANT NOTES | This release contains select important updates highlighted in red |
| Configuration Database | |
| FIX | Fixed a problem with MarvelClient Eclipse Plugin Update actions; the document contained a wrong condition leading to the plugin not being deployed/updated at all. NOTE: If you already have a plugin update action, please resave it after applying this update to your MC config database |
| FIX | Fixed a problem with the DLL update action having a default runtime of "background - init"; whilst this is a great idea for as soon as all users are running an MC DLL >= 3.0.x, this is a bad idea for old MC DLLs which should upgrade themselves (= as soon as your users are on MC release >= 3.0, you should use the "background - init" runtime to offload dll updates from after login. |
