

# Release Notes 2008-10-06

Config db ntf: 20081006210500  
Analyze db ntf: 20080811172500  
Windows Version: 1.5.18.266 :: MAC OS X Version: :: Linux Version:  
Eclipse Plugin

## Major Improvements: Enhanced location management

Configuration Database	
FIX	Fixed a problem with reader restrict / exclude in desktop icon actions; desktop icon actions with a restrict/exclude problem should be resaved after design update of the config (panagenda) database
Analyze Database	
- No changes -	- No changes -
.DLL Updates (Windows)	
FIX	Fixed clusterfailover for download of new/changed actions not working in previous releases
FIX	Fixed a problem with user-specific connection documents that would be newly created at every run, even if a connection document already existed.
FIX	Fixed a problem where backup of names.nsf would fail during client shutdown due to "file in use".
FIX	Fixed a problem with Preferences= from notes.ini not roaming
FIX	Fixed a problem with %LOOKUP_*% placeholders not supporting directory assistance (DA); In previous releases, these actions would only lookup values from "names.nsf" on the users mailserver; Now, these placeholders resolve values according to the mailservers addressbook configuration (whether its just names.nsf or DA)
ENHANCEMENT	Added new placholder %LOOKUP_MAILFILE_LOCAL% for location management actions
ENHANCEMENT	Added new placholder %LOOKUP_SHORTNAME% for location management actions
ENHANCEMENT	Realtime actions now support <ini:variablename> references
.dylib Updates (Mac OS X)	
not available	not available
.so Updates (Linux)
