MC dll/dylib - 10.0.3

ⓘ   This component release is part of MarvelClient 10.0

FIX	Fixed an issue with the code that handles multiple versions of MC binaries running at the same time. In a few combinations of versions /editions of MC this lead to several or no binaries being loaded.
ENHAN CEMENT	Added better detection of older MC binaries for cases where multiple binaries get loaded at the same time. Note: this does not mean older binaries will be disabled if they are loaded with a newer version, only that the new version detects them now.
CHANGE	Each instance of MC that is running will report all its findings about other versions to Notes client clock output.
