

MarvelClient Essentials

The HCL® Notes® management solution MarvelClient® Essentials from panagenda® is provided with HCL Notes, HCL Client Application Access (HCAA), and HCL Domino starting with release 10.0.1. MarvelClient Essentials can also be used to configure and analyze the freely included [client management scope of HCL Nomad clients](#) (on iOS and Android).

MarvelClient Essentials allows you to:

- Continuously analyze and visualize Notes workspace, client configuration, and operating system details.
- Take stock of your client deployment complexity and inconsistencies.
- Deploy files such as your Notes 10 upgrade image, run programs, and manage the Windows Registry.
- Provide IT, help desk, and management staff with details, facts, and data.
- Identify pitfalls during upgrades such as insufficient resources or non-standard installations.
- Prepare a more efficient upgrade path
- Reduce risk and help desk tickets

Customers who wish to use MarvelClient Essentials with earlier releases of Notes and Domino can download the installer from <https://www.panagenda.com/essentials>.

For MarvelClient Essentials, support is provided by HCL for Notes and Domino 9.0 and up.

For panagenda customers with [additional MarvelClient modules](#), support is provided by panagenda for Notes and Domino 6.0 and up*).
