

# Comparison of MarvelClient Essentials vs. MarvelClient Basic

The following table shows which features are included in panagenda [MarvelClient Essentials](#) and [MarvelClient Basic](#) (aka Analyze + Migrate + Manage):

## Important information for existing MarvelClient customers

Beginning with MarvelClient release 10, the MarvelClient binaries include all functionality of MarvelClient Essentials. The MarvelClient Essentials binary included in HCL Notes 10.0.1 and up will hand over to your existing MarvelClient binary, regardless of version.

| Analyze  | Essentials | Basic |
|--|------------|-------|
| Desktop, Bookmarks                             |            |       |
| notes.ini, User Preferences                    |            |       |
| Mailfile Details                               |            |       |
| HCL Notes Version and Installation Information |            |       |
| OS and HW Overview                             |            |       |
| Local Databases / Replicas                     |            |       |
| Eclipse and Plugin Details                     |            |       |
| Eclipse Settings (including Sametime)          |            |       |
| ECL  |            |       |
| Server<->Client Latency                        |            |       |
| ID File Details                                |            |       |
| Locations, Connections, Accounts, Certificates |            |       |
| HW / SW Inventory                              |            |       |
| Mail Archives                                  |            |       |
| Windows Application Usage                      |            |       |
|  |            |       |
| Configuration                                  | Essentials | Basic |
| notes.ini and MC Config Variables              |            |       |
| Any .ini File                                  |            |       |
| User Preferences                               |            |       |
| Windows Registry                               |            |       |
|  |            |       |
| Up/Download                                    | Essentials | Basic |
| Upload Data for Analyze                        |            |       |
| Upload Backups for Rollback                    |            |       |
| File Deployment                                |            |       |
| Smart File Downloader                          |            |       |
| Roll Back User Configuration                   |            |       |
|  |            |       |
| Run  | Essentials | Basic |
| Run Programs                                   |            |       |
| Run Notes Processes                            |            |       |

|                                      |            |       |
|--------------------------------------|------------|-------|
| Run Agents                           |            |       |
| Run Notes Formulas                   |            |       |
| Copy, Move, Delete Files             |            |       |
| Compact Desktop                      |            |       |
|                                      |            |       |
| <b>Manage</b>                        | Essentials | Basic |
| Workspace Pages                      |            |       |
| Desktop Icons                        |            |       |
| Local Replicas                       |            |       |
| Replicator Page                      |            |       |
| Bookmarks & Bookmark Folders         |            |       |
| Locations                            |            |       |
| Connections                          |            |       |
| ECL                                  |            |       |
| ID File Management                   |            |       |
| Profile Documents                    |            |       |
| Switch Location                      |            |       |
|                                      |            |       |
| <b>Migrate</b>                       | Essentials | Basic |
| Mass Change to Update Database Links |            |       |
| Mass Delete to Remove Database Links |            |       |
