

The Rich Client Essentials view

The [Rich Client Essentials] view (1) allows you to access readily available [Actions](#) provided from out of the box, as well create your very own Actions to, for example, manage client settings and better prepare your next client upgrades:

Note that Actions in the MarvelClient Config(uration) database can be tied to [Conditions](#) (2) and [Access Definitions](#) (3).

Customers who have purchased [additional MarvelClient functionality](#) can hide the Rich Client Essentials view and associated Essentials [Runtypes](#) by adding and assigning themselves the role [HideEssentials] in the Access Control List (ACL) of the MarvelClient Configuration database.
