

# MC Upgrade - 10.1.12

 This component release is part of [MarvelClient 10.1](#)

## MCUpgrade.exe

|             |                                                                                                              |
|-------------|--------------------------------------------------------------------------------------------------------------|
| FIX         | Fixed the issue the ProgressBarText was not translated according to language configuration                   |
| ENHANCEMENT | Graceful and Silent Shutdown are now multi-user compatible = will only process processes for current OS user |
| FIX         | Fixed an issue where using shutdown on e.g. Citrix could lead to error "unable to allocate memory"           |

## MCUpgradeMain.exe

|             |                                                                                      |
|-------------|--------------------------------------------------------------------------------------|
| ENHANCEMENT | MCUpgradeMain.exe will now automatically update the service component when necessary |
|-------------|--------------------------------------------------------------------------------------|

## MCKeyfileEditor

|             |                                                                                                                                                                                                                                       |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FIX         | When running MCKeyfileEditor outside of the MarvelClient Configuration wizard, the check for unsaved changes did not work in previous versions - it would often say "there are no changes" even though there were - this is now fixed |
| ENHANCEMENT | The username/password/domain/smtp* etc. fields are now checked for unsaved changes, too                                                                                                                                               |
