MC Config - 20191008121500

ⓘ   This component release is part of MarvelClient 11.0

ENHANCE MENT	The view "All actions\by Condition" has been improved to make it easier to find all actions that use a given condition.
ENHANCE MENT / NEW	The ECL action now can also manage the setting "HTTP / HTTPS Request execution".
FIX	**Fixed an issue where re-saving actions from the view would cause invalid XML to be created. This bug was introduced with template release 20190925135100.**
FIX	**Fixed an issue where opening and saving an Application action could change local replica management and full text index options from "Do nothing" to "Create". This bug was introduced with template release 20190925135100.**
FIX	When using the new UI to limit number of executions, the option to keep execution info will now be available again.
FIX	Fixed an issue where keeping the Config DB open when closing the client would lead to an @Command error being displayed when clicking on the tab after next client startup.
FIX	MCUpgrade Wizard: Fixed and issue where newlines in the graceful shutdown message weren't properly handled.
FIX / CHANGE	Using OnlineUpdate from the Actions menu is now working properly, several older options that have been deprecated a while ago have been removed as well.
FIX / CHANGE	The local directory for OnlineUpdate must be in the data directory. Instead of parts of the OnlineUpdate process failing when this is not the case, MarvelClient will now display an error at the start.
