

MC dll/dylib - 11.0.1

This page was moved to [MC 11.0 - Binary Release Notes](#)
Click in the link above if you are not automatically redirected in 10 seconds.

 This component release is part of [MarvelClient 11.0](#)

NEW	On Nomad, if setup fails, MarvelClient will now create a zip file with important support information (MC working directory and the IBM_TECHNICAL_SUPPORT directory) and put it into the Documents directory on iOS (the data can then be picked up and sent to support via the Files app).
CHANGE / ENHANCE MENT	Updated the ECL MarvelClient creates during client setup to match the one Notes 11 creates.
CHANGE	Improved logging: Removed some warning messages about hooks that were unnecessary and did not indicate a problem.
