This component release is part of [MarvelClient 11.0](#)

FIX	Fixed a critical issue where MarvelClient would reset the ECL to its default state on every client startup. This was introduced in dll version 11.0.1.
NEW	Added an action to set the new Workspace background. The background image can be attached to the action and downloaded from there, or it can point to a file that already exists locally on the client.
FIX	Non-English log messages related to file system operations will now be shown properly.
