

Analyzing Groups: Empty and Large Groups

Go to the "Group Analysis – by Name" view:

Group Analysis

by Name

by Size

Sort by Member Count, ACL Count and/or Mail Count to identify empty groups.

Member Count ▲	ACL Count ^	Mail Count ^
0	0	
0	0	0
0	0	
0	0	
0	0	0

Similarly, you may wish to identify your largest groups. Both ACL and Mail counts help you to easily identify groups through which end users might (accidentally) send emails to many recipients, or where groups grant too many users particular rights.
