# Analyzing ACLs: Identifying Databases that have been Deleted

Go to the "Database ACL Analysis – by Exception" view:

Databases that were moved or removed on a server, but that had been scanned previously, can be found in the category "- Removed -":

#	Server	Exceptio Date/Time Exception	Replica ID
1		⊞ – ACL entries referring to a Mail–Only group –	
35		⊞ – No Scanner Access	
6,670		⊟ – Removed –
