 This component release is part of [MarvelClient 11.0](#)

FIX	Fixed an issue where references to <notes:version_major> before login would return the wrong value: "10" instead of "11" for Notes 11 Clients.
ENHANCEMENT	The Roaming/Rollback action now has a new option to add an additional authentication URL for http-based roaming via Notes-DB. This URL will be opened before the main URL and can be used to force proper authentication.
