MC Config - 20200526142900

ⓘ   This component release is part of MarvelClient 11.0

FIX	Fixed an issue in OnlineUpdate, where sometimes it would display the following error: "Form has been deleted. The application design may be out of date. Try updating the application design."
	This error did never interfere with OnlineUpdate itself, it just prevented a final dialog with detailed info about the updated components from being displayed. The components are now instead shown in the OnlineUpdate form itself, on a new tab next to the "Progress"-tab.

MC Upgrade-related Changes

FIX	**Fixed an issue where instructions in MCUpgrade wizard were 000 based instead of 001 based.**
