NEW	The Initiator Process can now be paused via right-click on the tray icon and toggle of the Pause menu option.
FIX	Fixed an issue where the log file created/used during Initiator/SourceDirectoryInit was in SourceDirectoryInit instead of SourceDirectoryInit:ini:UpgradeDirectory
FIX	Fixed an issue where the dedicated progress bar was possibly launched twice (the second one did not show and exited immediately, but not launching it when it's already running is just better 😊).
