This component release is part of [MarvelClient 11.0](#)

ENHANCEMENT / NEW	New MC config variables that indicate where the actions.xml file was downloaded from. <mc:actions_last_remote_source> will be set to "networkdirectory" or "backupset" depending on where it came from, and <mc:actions_downloaded_networkdirectory> or <mc:actions_downloaded_backupset> will be set to "1" if the downloaded actions.xml file from that location was newer than the local actions.xml file.
FIX	MarvelClient on MacOS can now properly install and update the MarvelClient Eclipse plugin on Mac Notes 11 clients. Changes in the Notes 11 client caused this to stop working on MacOS only.
