# MC Binary - 11.0.30

**This page was moved to MC 11.0 - Binary Release Notes**
**Click in the link above if you are not automatically redirected in 10 seconds.**

This component release is part of MarvelClient 11.0

| | |
|---|---|
| NEW | New MC config variables:<br>○ **os:process_creation_time** = the time the Notes client process was started<br>○ **os:process_runtime_ms** = the amount of time the Notes client has been running, in milliseconds<br>○ **os:user_idle_time_ms** = the amount of idle time (no keyboard or mouse activity) for the current user session, in milliseconds<br>○ **os:user_documents_directory** = absolute path to the current user's Documents directory<br>○ **os:user_downloads_directory** = absolute path to the current user's Downloads directory<br>○ **os:user_desktop_directory** = absolute path to the current user's Desktop directory |
| ENHANCEMENT | Add Big Sur to the list of known versions of MacOS. |
| CHANGE | Improve error handling of the new action to manage JSON and XML files. |
| FIX | The "remove" option of the new action to manage JSON and XML files was not working properly in the previous version. Now it does. |
| FIX | Fix a problem where FSAC (first server access) actions might not be triggered if the MailServer in the location document or the notes.ini file has an old-style, non-hierarchical "flat" name. |
