 This component release is part of [MarvelClient 11.0](#)

NEW	<p>New MC config variables:</p> <ul style="list-style-type: none"><li>◦ <b>os:process_creation_time</b> = the time the Notes client process was started</li><li>◦ <b>os:process_runtime_ms</b> = the amount of time the Notes client has been running, in milliseconds</li><li>◦ <b>os:user_idle_time_ms</b> = the amount of idle time (no keyboard or mouse activity) for the current user session, in milliseconds</li><li>◦ <b>os:user_documents_directory</b> = absolute path to the current user's Documents directory</li><li>◦ <b>os:user_downloads_directory</b> = absolute path to the current user's Downloads directory</li><li>◦ <b>os:user_desktop_directory</b> = absolute path to the current user's Desktop directory</li></ul>
ENHANCEMENT	Add Big Sur to the list of known versions of MacOS.
CHANGE	Improve error handling of the new action to manage JSON and XML files.
FIX	The "remove" option of the new action to manage JSON and XML files was not working properly in the previous version. Now it does.
FIX	Fix a problem where FSAC (first server access) actions might not be triggered if the MailServer in the location document or the notes.ini file has an old-style, non-hierarchical "flat" name.
