Install Flash plugin on Appliance

It could be that the flash plugin is not installed for the firefox webbrowser on the appliance level.

In order to install it, please perform the following steps

- Download the offline RPM file   Offline RPM Flash Plugin
- Copy the file into /tmp of your GL appliance
- execute:

    yum install /tmp/flash-player-npapi-32.0.0.465-release.x86_64.rpm

    click "y" to approve the installation

- after the installation. please copy the mms.cfg file (Download mms.cfg) to **/etc/adobe** (create the folder in case it doesn't exist)

    make sure that the mms.cfg has https://localhost:443 in place

- open firefox browser on the appliance level and access https://localhost/vimes/vimes.html
