 This component release is part of [MarvelClient 11.0](#)

ENHANCEMENT / NEW	Added support for managing replication priority for local databases. Requires Config template 20201216103500 or higher.
ENHANCEMENT / NEW	Added support for managing the "send outgoing mail" and "send outgoing internet mail" entries on the system replicator page. Requires Config template 20201207161500 or higher.
ENHANCEMENT / NEW	Added support for mail blocking based on time condition (days of week, start and end times). Requires Config template 20201207161500 or higher.
ENHANCEMENT / NEW	Added option for doing a server lookup to find cluster members, when "Enforce Clustermembers" is checked for an Application /Mailfile action. Requires Config template 20201207161500 or higher.
ENHANCEMENT	Locations and connections are now also considered managed if the action is set to 'add' and they already exist. Also improved logging when dealing with managed locations.
ENHANCEMENT	Ignore linefeeds in single-value fields in location documents, which could cause inconsistencies in the Analyze database.
FIX	Fixed a rare problem where the new <os:process_runtime_ms> variable could be incorrect and far too big.
