Document Properties Plugin

The panagenda Document Properties plugin comes pre-installed in your Notes Standard (Eclipse-based) client, version 12.0.1 or higher. It gives you a new "Advanced Properties" right-click menu for selected documents in a view, as seen on the right.

You will also see Advanced Properties options in the top-level File menu and the File - Application menu. They will only be visible when a Notes view or a Notes document are currently being viewed in the client.

Ready to Start?

- Visit panagenda Document Properties Plugin on our website!
- Learn about Document Properties Pro

How does it work?

- Viewing Advanced Document Properties
- Viewing Profile Documents
- Comparing Documents

For administrators
