

The MarvelClient Analyze Database

The MarvelClient Analyze Database holds all information about your HCL Notes clients from all your end users in one database.

Please make sure that you have read through [Fast start into the MC Analyze database](#), especially with regards to unzipping of uploaded data.

Numerous [views](#) allow you to investigate whether clients do not match your expectations or corporate standard across operating system details, HCL Notes client properties and settings, notes.ini entries, desktop icons and more:

The screenshot shows the MarvelClient Analyze Database interface. The sidebar on the left contains navigation options: 'Users' (with sub-options like 'by State & UpKey', 'by Notes-Name', 'by Date last uploaded', 'by Startup/Shutdown', 'Cloud Onboarding Status', 'by OnPrem Server', 'by Mail Server', 'waiting for deletion'), 'My Favorites', 'Self-created Folders' (with sub-options like 'R. Repl-Page-Entry by Location', 'R. Repl-Page-Entry by Status'), 'OS / HW' (with sub-options like 'by Operating System', 'by Client HW Type', 'by Resources', 'by Computename', 'by OS Username', 'by IP-Address', 'by Screen Resolution', 'by OS Locale'), and 'IBM Notes' (with sub-options like 'by Notes & MC Rel.', 'by OS and Notes Rel.'). The main area displays a table titled 'Audit Selected' with columns: '#', '%', 'Rel.', 'Status', 'Date last uploaded', and 'Upload Key'. The table lists various client releases and their counts, such as 'Release 10.0' and 'Release 9.0'.
