

The Header Section

The Header Section of the MarvelClient Upgrade Wizard contains the most important configuration elements:

Title:

Notes 11.0.1 FP3 (Users)

mcupgrade config
Licensed (MarvelClient Upgrade)

Package name:

The package name is used to uniquely identify each upgrade configuration in automatically created Actions upon publishing and for tracking via the MarvelClient Analyze database. Once published, the package name must not be changed anymore. Please keep the package name short and simple, e.g. "Notes 10.0.1", "Notes 10.0.1 FP1 full", "Notes 10.0.1 FP1 only" and similar.

Notes 11.0.1FP3 Users

Type of Upgrade / Update:

☒ Full client + optionally Fixpack / Hotfix / other

☐ Fixpack / Hotfix / other only

☐ Freestyle

Wizard mode:

☒ Fast Track/Super easy

☐ Give me all the options

Client Configuration

Advanced

- 1. **Title** of the Upgrade Configuration document. Use whatever text, including any special characters, to describe your upgrade configuration.
- 2. **Package name**: Technical descriptor of your upgrade configuration.

IMPORTANT

Do not use special characters for the package name. +*./_ (blank, plus, star, dot, minus/dash, slash and underscore) are fine.

- 3. **Type of Upgrade**: Choose whether you want to
 - a. install a **full client package** (with or without additional addons)
A full client install comes with various differences, such as uninstalling the old client (whilst preserving the data directory), moving data directories (if applicable) and much more
 - b. install a **fixpack, hotfix or other component** only
 - c. create a **freestyle** configuration with very little validation and sanity checking (not recommended, primarily used by panagenda consulting and support)
- 4. **Wizard mode**: Choose whether you want a **Super easy** configuration or **All options**
- 5. **Prepare or Publish Upgrade**: The button turn blue and clickable as soon as you have filled in the most important fields in the table below
- 6. Various **tabs** to configure your upgrade - the number of tabs and labels depends on the Wizard mode and other settings
- 7. **Licensing information** for MarvelClient Upgrade
