 This component release is part of [MarvelClient 11.0](#)

FIX	Fixed an issue where we collected jvmlauncher.log instead of jvmpatcher.log
FIX	Fixed an issue where the Expand All link at the top of summary emails never worked
FIX	Fixed an issue where the progress bar would not show the splash image, but only labels and progress bars when running as SYSTEM
FIX	Fixed an issue where rcplauncher.log, .prov2install.log and provisioning.log were not collected when running as SYSTEM
FIX	Fixed an issue where SMTP progress emails could contain two emails in one, if sent within the same second
FIX	Fixed an issue where failed mail sends using SMTPMailer=blat were wrongly logged as successful
FIX	Fixed an issue introduced in 11.0.78 where for single user / admin& designer clients, Directory was wrongly set to NotesProgramDirectoryNew (where notes.ini is) instead of NotesDataDirectoryNew
FIX / CHANGE	Fixed an issue where %localappdata% was resolved as C:\WINDOWS\system32\config\systemprofile when running MCUpgrade via System without console session
FIX / CHANGE	The Expand All and Collapse All links at the beginning of summary email will now only be displayed in browsers and MIME renderers which support JavaScript 1.6 or newer That also means, that they will no longer be visible in Notes clients, since neither of the MIME renderers support JS 1.6 or newer
FIX / CHANGE	When running as system without console session, %localappdata% will now be resolved as localappdata of default user (usually C:\Users\Default\AppData\Local)
FIX / CHANGE / ENHANCEMENT	Multiuser Directory migration will now occur for all folders under user root (usually C:\Users\*) that match the old notes data suffix (i.e. \Vendor\Notes\Data)
CHANGE / ENHANCEMENT	Citrix Optimization will ignore the following settings when launched without MultiUserSharedDataNew: for jvm.properties: - any line where the value contains %MCU_MultiUserSharedDataNew_Coptim% - vmarg.Xnolinenumbers=-Xnolinenumbers - vmarg.Dshare=%MCU_Unmerge%,singleJVM for rcplauncher.properties: - config.system.1=%MCU_RemoveIf%-data - config.system.2=%MCU_RemoveIf%\$(rcp.home)/rcp/systemdata
ENHANCEMENT	The Citrix Optimization option Disable DEP now also works for any upgrade for which at least NotesProgramDirectoryNew is specified
ENHANCEMENT	The Citrix Optimization option Compact Templates now also works for any upgrade where NotesDataDirectoryNew is specified, but MultiUserSharedDataNew is not (then compacting templates in NotesDataDirectoryNew)
ENHANCEMENT	Added a Collapse All link at the top of summary emails
ENHANCEMENT	Added progress display in second progress bar for Multiuser migration and cleanup
