 This component release is part of [MarvelClient 11.0](#)

Config DB - General

ENHANCEMENT	<p>Initial release with Change Logging.</p> <p>The Config database now logs changes when Actions are modified, so you have a record of what changed and when.</p> <p>Changes to the Action XML can be seen in the Advanced - Logs view, in the new "Changelog" category. The logs will only appear after changes are made with an updated Config database template (changes made using older templates will not be available).</p>
CHANGE	<p>The Automate agent now also uses the "no access" field from SecurityInsider, to check for users who have been explicitly denied access to a database.</p>
FIX	<p>Fixed a problem with the Mail-based installer, where a client running MarvelClient Essentials in "full" mode could get the wrong filename when an updated DLL is installed in the data directory.</p>
FIX	<p>Fixed a crash in the Mac client when using the "Audit Selected" button</p>

Config DB - MC Upgrade UI

ENHANCEMENT	<p>When using URL as a download location on the Distribution tab of a Configuration document, you now have the following new options:</p> <ul style="list-style-type: none">• Username• Proxy server• Follow redirects• Close connection after each chunk• Additional URL options
FIX	<p>Fixed a problem where hashes were not being updated when an Installer was reindexed in an Installer document.</p>
