

# MC Config - 20210525132900

This page was moved to [MC 12.0 - Database Release Notes](#)  
Click in the link above if you are not automatically redirected in 10 seconds.

 This component release is part of [MarvelClient 12.0](#)

## Config DB - General

<b>ENHANCEMENT</b>	New section in the Sametime Autostatus action form for meetings found in calendar. Requires Plugin version 12.0.0 or higher.
<b>ENHANCEMENT / FIX</b>	Better calculation of release notes links for new dlls, plugins, and templates downloaded by OnlineUpdate (some of the new MC 12 links were being calculated incorrectly).
<b>FIX</b>	Fixed a problem where setting all fields in a Location action to "only if new" still left a few fields set to "always". This didn't cause any reported problems, but it shouldn't have happened.

## Config DB - MC Upgrade UI

<b>ENHANCEMENT</b>	MCUpgrade now supports 64-bit installers.
<b>ENHANCEMENT</b>	Added a confirmation prompt if someone tries to delete an upgrade configuration.
<b>FIX</b>	Fixed a problem where MCUpgrade emails were sometimes delivered in a different order than expected.
<b>FIX</b>	Fixed a problem where the Upgrade Config Wizard could fail silently if there are multiple installers with the same name.
