MC for Nomad Licensed Features

Below is a list of MarvelClient features that are currently available and licensed for the various HCL Nomad platforms. Additional functionality might be available in the future, as new features become available in both MarvelClient and HCL Nomad.

In general:

- **MarvelClient for Nomad Mobile** (iOS and Android) has features available to the MarvelClient Basic license
- **MarvelClient for Nomad Web** has features available to the MarvelClient Essentials license by default
- MarvelClient customers who have a Basic license also get additional features on MarvelClient for Nomad Web

You can see a chart with the different features available for Essentials and Basic licenses for rich client platforms on this page: Comparison of MarvelClient Essentials vs. MarvelClient Basic

The chart below is similar, although features that aren't available on HCL Nomad clients due to platform limitations are not listed.
