 This component release is part of [MarvelClient 12.0](#)

NEW	<p>The Devices and Platform selector now supports the selection of Nomad Web. The selector for Linux has been removed.</p> <p>Except for Location and Connection actions, any existing non-restricted action will automatically run on HCL Nomad Web, too.</p> <p>Any existing Location and Connection actions, and any existing actions that are restricted to any number of devices and/or platforms, must be specifically edited and enabled for Nomad Web.</p> <p>NOTE: You are advised to not enable existing Location and Connection actions for Nomad Web, but to create new, dedicated actions for Nomad Web. The simple reason is that Nomad Web requires the WSS port, whereas rich clients usually make use of the TCP/IP port. See below for details regarding the new Nomad Location action.</p>
NEW	<p>A new "Nomad Location" action is now available. This should be used for management of the Location document on Nomad clients instead of the standard Location action.</p> <p>Note that existing Location actions will not run on the latest Nomad client builds unless you explicitly resave them and specify the Nomad clients they should run on. We strongly encourage you to use the new Nomad Location action instead of activating old Location actions for Nomad.</p>
NEW /CHA NGE	<p>Nomad App Restrictions also run on Nomad Web.</p> <p>The Nomad Web platform only supports a specific subset of App Restrictions. The action form in the Config DB has icons that indicate which App Restrictions are available on the different Nomad platforms.</p>
ENH ANC EME NT	<p>Added a high resolution database icon for Notes 12.0.1.</p>
FIX	<p>On the Location document, 'Type-ahead shows server contacts before local' now properly shows the setting in read mode.</p>
FIX	<p>Fixed an "image cannot be found" error that could happen on Workspace Background action forms.</p>
FIX	<p>Fixed a problem where high color icons could be missing in the DesktopIcon action.</p>
FIX	<p>Fixed a "CollectionScheduledAgents" error that could occur in specific versions of Online Update.</p>
FIX	<p>Added a few missing Dutch translation strings.</p>
