

Release Notes v2.1.1

panagenda is proud to announce a new release of iDNA Applications. Whether you're in a Notes/Domino modernization or migration project, iDNA gives you the knowledge to deliver the most difficult projects efficiently, on time and on budget. This new version is mainly a maintenance release containing several important bug fixes.

- [Improvements & Bug Fixes](#)
- [Structural Changes / Upgrade Path](#)
 - [Data Warehouse Rebuild Required](#)
 - [Upgrade Procedure: Container Installer](#)

Improvements & Bug Fixes

Data Collection: A bug has been fixed that could lead to an issue while collecting Person Documents from the Domino Directory.

Data Export: A date formatting issue has been fixed with data exports from Catalog grids. Exported dates are now properly sortable again.

Mail Reports: Date filtering logic was harmonized across all dashboards.

Mail Reports: A calculation issue was fixed in the Mail Recipient Distribution dashboard.

Metabase: Metabase has been upgraded to the latest and greatest version.

Metabase: Help text regarding filtering options has been improved in several dashboards.

Metabase: An issue has been resolved with logging. Logs are now available again in `"/opt/panagenda/logs/metabase/"`.

Nightly Data Processing: An issue during the processing of the name variations has been fixed.

Structural Changes / Upgrade Path

Data Warehouse Rebuild Required

DWH Rebuild Required

After installing the update, parts of the application may not be available until the data warehouse is rebuilt. This process runs automatically at night, but can be triggered manually after the update. On the first login after the installation, more information on this topic will be displayed, along with the option to trigger the rebuild.

Upgrade Procedure: Container Installer

Details on how to update to this new version can be found in the knowledge base article [Upgrading iDNA Applications](#).
