

Release Notes v2.1.2 (Critical Update)

panagenda is proud to announce a new release of iDNA Applications. Whether you're in a Notes/Domino modernization or migration project, iDNA gives you the knowledge to deliver the most difficult projects efficiently, on time and on budget.

IMPORTANT

This version includes a critical bug fix to address the [Log4Shell vulnerability](#). Updating is highly recommended!

IMPORTANT

- [Improvements & Bug Fixes](#)
- [Structural Changes / Upgrade Path](#)
 - [Data Warehouse Rebuild Required](#)
 - [Upgrade Procedure: Container Installer](#)

Improvements & Bug Fixes

Log4Shell: All relevant components have been upgraded to appropriate versions that are not affected by this vulnerability.

Nginx: Security has been tightened around supported protocols, ciphers and related security settings

Structural Changes / Upgrade Path

Data Warehouse Rebuild Required

DWH Rebuild Required

After installing the update, parts of the application may not be available until the data warehouse is rebuilt. This process runs automatically at night, but can be triggered manually after the update. On the first login after the installation, more information on this topic will be displayed, along with the option to trigger the rebuild.

Upgrade Procedure: Container Installer

Details on how to update to this new version can be found in the knowledge base article [Upgrading iDNA Applications](#).
