 This component release is part of [MarvelClient 12.0](#)

NEW	Added a new option ini:MultiUserSymlinkCleanup; defaults to 1 if one or more uninstall instructions present in MCUpgrade.ini; otherwise not set. If set to 1, will delete any Lotus/IBM/HCL redirects according to MultiUserSharedDataOld and MultiUserSharedDataNew (e.g., C:\ProgramData\Lotus\Notes > C:\ProgramData\HCL\Notes) This fix is important for all customers upgrading to HCL Notes 12.0.1, due to an issue with how the HCL installer treats pre-existing redirects /symlinks
FIX	Fixed an issue where cleanup of directories was skipped, due to erroneous detection of same folders as redirects, e.g. <i>Skipping removal of [C:\ProgramData\Lotus\Notes\Data]; [C:\ProgramData] is a redirect to [C:\ProgramData] ...</i>
FIX	Fixed an issue where the old notes shared data was not cleaned up, if it pointed to a symlink folder; After reading ini:MultiUserSharedDataOld, redirects (symlinks and junction points) are now resolved immediately
FIX	Fixed an issue where negative exit codes (e.g., -10) from MCUpgradeMain were treated as success
