

Release Notes v2.3.1

panagenda is proud to announce this new release of iDNA Applications. Whether you're in a Notes/Domino modernization or migration project, iDNA gives you the knowledge to deliver the most difficult projects efficiently, on time and on budget. This new version is a maintenance release.

- [Improvements](#)
- [Bug Fixes](#)
- [Structural Changes / Upgrade Path](#)
 - [Upgrade Procedure: Container Installer](#)

Improvements

Nightly Processing: The nightly data warehouse update process has been optimized to reduce runtime.

Design Collection: Several improvements were made that will increase performance of the design collection process.

Bug Fixes

Design Collection: An issue has been resolved that could lead to re-scanning databases outside the configured time frame for re-scans.

Nightly Processing: An issue has been resolved that could lead to a database constraint violation in case a group and a user with the same name exist.

Structural Changes / Upgrade Path

Upgrade Procedure: Container Installer

Details on how to update to this new version can be found in the knowledge base article [Upgrading iDNA Applications](#).
